(d) On the production of a clock, or clocks, after a race they shall be struck against the chronometer and thus obtain the total variation, which shall be added or deducted in the usual way, except in the event of a clock gaining at a rate of more than 7 seconds per hour, the

registered time on the dials will be taken as the time of arrival, and in the event of a clock losing at a rate greater than 7 seconds per hour, double the slow time is to be added to the registered time.

NOTE : In the event of a clock ceasing to work after the bird has been timed in, the clock shall be deemed a slow clock.

(e) All paper tapes or dials must show the date, number of the clock and the signature of one of the Clock Committee. No time shall be given unless the clock opening puncture appears on or after the registered time when the clock was struck against the chronometer after timing in.

(f) Any competitor whose clock shall, on being opened, show more than the recognised regulation punctures or print, shall have that clock confiscated and forwarded to the GMPF Clock Chairman.

Exceptions to these rules will apply where a member is unable to present his clock for one of the following reasons :-

(1) The members loft is located at a distance from the clocking centre that, in the opinion of the Executive Committee, places that member at a disadvantage to his competitors, in that travelling time is excessive and may not allow the member reasonable time to clock second or third pigeons. Such a member will need to make application for extended clocking time to the Executive Committee, the application must be made in writing prior to the commencement of the season, and should be represented through the members club delegates. The decision of the Executive Committee shall be final and binding.

the second click). This process may be performed at least one (1) week prior to the first basketing night or earlier as required by the Club or the GMPF. The GMPF or Club may allow a competitor to affix or attach electronic bands to a pigeon, subject to verification by the Centre Supervisor, that the band's locking mechanism is securely engaged.
